

UNESCO 教師與學生 AI 素養自主學習評量網站

UNESCO AI Literacy Self-Learning Assessment Website

中英雙語操作與建置說明 / Bilingual Operation and Build Manual

版本日期：2026-05-22。這份手冊搭配 GitHub Pages
靜態網站使用，適合課堂示範、學生自主學習與教師說明資料流程。

Version date: 2026-05-22. This manual supports a static GitHub Pages website for classroom demonstration, self-learning, and explaining the data workflow.

1. 網站目的 / Purpose

本網站結合東華大學學習關懷預警系統的概念、AI 適性測驗流程，以及 UNESCO 2024 年 AICFT 與 AICFS 兩份框架。使用者會依序完成知情同意、登入、框架選擇、RAG-style 對話、10-30 題自評、診斷回饋與 PDF 報告。

The site combines a learning-care warning concept, an adaptive-testing style flow, and UNESCO's 2024 AICFT and AICFS frameworks. Users complete consent, login, framework selection, RAG-style chat, 10-30 self-assessment items, diagnostic feedback, and a PDF report.

重要限制：這是課堂原型，不是正式心理測驗，不含 IRT。靜態 GitHub Pages 無法安全保存全班資料，因此資料先存在瀏覽器 localStorage，並提供 CSV 匯出。正式版應串接 Google Sheets Apps Script、Firebase、Supabase 或校務系統。

Important limitation: this is a classroom prototype, not a formal psychometric test, and it does not include IRT. Static GitHub Pages cannot securely store class-wide data, so records are stored in browser localStorage and can be exported as CSV. A production version should connect Google Sheets Apps Script, Firebase, Supabase, or an institutional system.

2. 學生操作流程 / Student Workflow

步驟 / Step	學生要做什麼 / What students do
1	閱讀知情同意，勾選同意後進入登入頁。 / Read informed consent, check agreement, and continue.
2	輸入姓名、學號或代號、班級、角色與課堂代碼。 / Enter name, ID, class, role, and course code.
3	選擇 AICFT 或 AICFS，選擇能力面向、層級、題數 10-30 題與學習模式。 / Choose AICFT or AICFS, aspect, level, 10-30 items, and mode.
4	在對話頁詢問框架問題，或按「讓 AI 問我一題」進行反思。 / Ask framework questions or let the AI coach ask a reflection question.
5	依實際能力作答，每題 1-4 分。 / Answer honestly on a 1-4 scale.
6	查看總分、面向分數、預警訊號與建議，列印或另存 PDF。 / Review score, aspect profile, warning signal, recommendations, then print or save PDF.

3. 本機預覽指令 / Local Preview Commands

教師若要在自己的電腦示範，先切換到專案根目錄，再啟動簡單伺服器。If the teacher wants to preview locally, go to the repository root and start a simple server.

```
cd "G:\我的雲端硬碟\05AI資料\codex\aischool"
python -m http.server 4173
# Open in browser:
# http://localhost:4173/unesco-ai-literacy/
```

4. GitHub Pages 部署與推送指令 / GitHub Pages Deployment Commands

本網站位於既有 GitHub 專案 Shuwen6674/aischool 的子目錄。推送後預期網址如下：

```
https://shuwen6674.github.io/aischool/unesco-ai-literacy/
```

若要手動重做推送，可使用以下指令。注意：因為此專案根目錄已有其他未提交檔案，請只加入 unesco-ai-literacy 子目錄，避免誤提交其他資料。

```
cd "G:\我的雲端硬碟\05AI資料\codex\aischool"
git status --short
git add unesco-ai-literacy
git commit -m "Add UNESCO AI literacy assessment site"
git push origin main
```

5. 試算表資料設計 / Spreadsheet Data Design

網站提供 docs/AI_literacy_tracking_schema.xlsx 作為資料欄位設計。正式串接後可建立下列工作表：

Sheet	Use
Consent_Log	知情同意紀錄 / consent events
Login_Log	登入紀錄 / classroom login records
Chat_Log	對話紀錄 / learner and AI coach messages
Assessment_Log	評量總表 / completed assessment attempts
Dimension_Scores	面向分數 / one row per dimension score
Assessment_Items	題庫欄位 / item bank fields
Early_Warning_Rules	預警規則 / green, yellow, red score bands
Data_Dictionary	資料字典 / terms and definitions

6. 教師上課建議 / Teaching Suggestions

- A. 先讓學生看知情同意，討論資料最小化、保存期間與誰能看到資料。
 - B. 讓一組學生選 AICFS，另一組扮演教師選 AICFT，比較兩個框架的面向與層級。
 - C. 對話頁可以要求學生提出一個問題，再把 AI 回答轉化成可觀察行為，最後用作答區檢核。
 - D. 回饋頁的綠、黃、紅訊號用於學習支持，不用於排名。教師可請學生根據最低面向寫下一個一週行動計畫。
- A. Start with informed consent and discuss data minimization, retention, and access.
 - B. Ask one group to use AICFS and another to role-play teachers using AICFT, then compare aspects and progression levels.
 - C. On the chat page, ask students to pose a question, convert the response into observable behavior, and check it in the assessment area.
 - D. Treat green, yellow, and red signals as support indicators, not rankings. Ask learners to write a one-week action plan for the lowest aspect.
